Water Tank Type Wire Drawing Machine Introduction: Water tank type wire drawing machine drawing finished wire diameter between 0.1mm to 1.2mm, the processing characteristics is sliding drawing for multi-passes drawing

There're heavy water tank wire drawing machine and flip water tank wire drawing machine we supplying , which are suitable for drawing detailed specifications in a variety of metal wire, especially suitable for drawing high carbon steel wire, galvanized wire, bead wire, hose wire, tungsten, molybdenum, titanium alloy wire, aluminum wire and other steel cord and wire
